Made in USA Brand

The Made in USA Brand Certification Mark logo is the only certification mark registered with the United States Patent and Trademark Office for labeling and identifying goods either made or grown in the United States. The Made in USA Brand Certification Mark provides a standard symbol for Made in USA product identification. American companies now have a distinctive, registered certification mark for labeling the United States as country of origin on their packaging and goods. When printed on labels by accredited manufacturers, consumers are able to identify at a glance which products are made in the USA. The Certification Mark is available to be downloaded by U.S. businesses that self-certify they meet the accreditation standards based on the Federal Trade Commission's regulations for complying with Made in USA origin claims found at madeintheusabrand.com/form/. In consideration of the license granted to download and use the Made in USA Brand Certification Mark on the Licensee's products, marketing materials and web site, Licensee agrees to pay an annual license fee based upon Licensee's gross annual Revenue.
